## TEACHING

### *University of North Carolina at Chapel Hill*

#### Instructor

Spring 2018–2019	Epidemiologic Analysis of Time-To-Event Data
Fall 2012	SAS Programming and Data Management

#### Guest lecturer

Spring 2012–2017	Epidemiologic Analysis of Time-To-Event Data
Fall 2015–2016	Fundamentals of Epidemiology
Fall 2013	Epidemiologic Analysis of Binary Data
Fall 2011	SAS Programming and Data Management

#### Teaching assistant

Spring 2012–2013	Epidemiologic Analysis of Time-To-Event Data
Spring 2011	Quantitative methods in Epidemiology
Fall 2009	Fundamentals of Epidemiology

### *Short courses and workshops*

January 2019: Co-instructor, Capture-Recapture Workshop, Raleigh, North Carolina

January 2016: Instructor, Priorities for local AIDS control efforts workshop, Cape Town, South Africa

## FUNDING

### *Pending*

NIH/NIAID R21 (PI: J. Edwards)

01/01/2019 – 12/31/2021 \$275,000

*Evaluation of intervention portfolios in HIV cohorts using new two-stage study designs*

The goal of this work is to develop and illustrate novel two-stage parametric g-computation methods to quantify impacts of comprehensive intervention portfolios in observational HIV cohorts when exposure to candidate interventions is incompletely measured. Results from this work will provide investigators with tools to leverage fragmented real world data to answer important public health care delivery questions among HIV-positive populations and guide clinical decision making.

NIH/NIGMS R01 (MPI: J. Edwards & J. Lessler)

01/01/2019 – 12/31/2021 \$2,500,000 (direct, all years)

*Algorithm Agnostic Integration of Mechanistic and Statistical Models for Disease Forecasting*

The purpose of the proposed project is to improve inference, forecasting and decision making in response to emerging infectious diseases by developing a framework to integrate mechanistic and statistical approaches to epidemic modeling and causal inference. Approaches developed will be validated using simulations and retrospective data and applied prospectively to reduce morbidity and mortality in emerging public health crises. Further, they will be incorporated into publicly available tools for use in epidemic response.

### *Current*

NIH/NIAID K01AI125087 (PI: J. Edwards)

12/15/2016 – 12/14/2021 \$658,028

*Comparative effectiveness of tailored HIV treatment plans and mortality*

The overall goal of this K01 application is to optimize clinical care decisions for people living with HIV. Specifically, this project will explore how antiretroviral therapy regimens affect cause-specific mortality and how treatment plans can be tailored or personalized based on patient characteristics to improve survival.

USAID AID-OAA-L-14-00004 (PI: J. Thomas)

*Monitoring and Evaluation to Assess and Use Results (MEASURE) Evaluation Phase IV Project*

- *Effect of mobility on treatment outcomes among mobile populations infected with HIV and TB in East Africa Cross-Border Regions*

(Activity Lead: J. Edwards)

01/01/2018 – 6/31/2019 \$1,000,000 (total)

To estimate the impact of mobility on TB and HIV treatment outcomes among mobile and vulnerable populations coinfecting with TB and HIV in East Africa cross border regions.

### *Completed*

UNC CFAR Developmental Award (PI: J. Edwards)

11/1/2015 – 10/31/2016 \$30,000

*Examining causes of death among patients with HIV in the United States*

To present critical information on trends in causes of death among patients with HIV in the United States.

NIH/NIAID R01AI100654 (PI: S. Cole)

03/19/2013 – 02/28/2017 \$1,000,000 (direct, all years)

*Structural models for treatment and exposure effects in clinical HIV cohorts*

The overall goal of this proposed research is to develop, apply and disseminate advanced, yet practical quantitative methods to enable accurate inference from complex longitudinal data on individuals infected with HIV.

NIH/NIAID DP2HD084070 (PI: D. Westreich)

09/15/2014 – 08/31/2019 \$1,500,000 (direct, all years)

*From patients to policy: innovative epidemiology for implementation science*

To innovate and extend epidemiologic methods to create usable tools for translating scientific results of typical studies into public health policy.

USAID AID-OAA-L-14-00004 (PI: J. Thomas)

07/01/2014 – 06/28/2017 \$12,102,280 (total)

*Monitoring and Evaluation to Assess and Use Results (MEASURE) Evaluation Phase IV Project*

- *Impact evaluation of the Cross Border Health Integrated Partnership Project*

(Activity Lead: J. Edwards)

06/01/2015 – 12/31/2016 \$1,871,000 (total)

To estimate the impact of the cross border health integrated partnership project, a multifaceted structural intervention implemented in 10 cross border sites in 5 countries in East Africa

- *Phylogenetic analysis of HIV infections in cross border sites in East Africa*

(Activity Lead: J. Edwards)

08/01/2016 – 05/01/2017 \$790,000 (total)

To identify and describe HIV transmission clusters occurring among key populations in cross border sites in East Africa and to describe patterns of resistance to antiretroviral medications in these populations.

- *Estimation of the sizes of key populations in the Dominican Republic*

(Activity Lead: S. Hileman)

08/01/2016 – 12/31/2017

To estimate the sizes of key populations in the Dominican Republic, including female sex workers, men who have sex with men, and transgender people.

Gates Foundation PHSEZE81 (PI: S. Weir)

01/01/15 – 06/30/17 \$711,007 (total, current year)

*MESH Consortium: Key Populations Working Group*

The unique contribution of the consortium will be to maximize the potential of data routinely collected through HIV surveillance and service delivery platforms to provide timely information on key outcomes in relevant populations at a level appropriate to support resource allocation and realignment.

FHI 100303/W0936 (PI: S. Weir)

07/03/2014 – 03/10/2017 \$812,030 (total, current year)

*Linkages across the continuum of HIV services for key populations affected by HIV*

- *Improving estimates related to the HIV care continuum in the Dominican Republic*

(Activity Lead: J. Edwards)

10/01/2015 – 12/31/2016 \$300,000 (total)

To improve estimates of virologic suppression for sex workers and men who have sex with men in care for HIV in the Dominican Republic

New Aid Foundation Grant for the study of neglected tropical diseases. (PI: J .Edwards)  
7/1/2010 - 7/1/2011 \$4000 (total)

*t. cruzi* infection and cognitive development in primary school children in rural Nicaragua  
To provide information to local public health leaders on the prevalence of Chagas disease among children in rural Nicaragua and to assess the extent to which Chagas disease affects cognitive development.

ACADEMIC  
SERVICE

Coordinator, Causal inference research group, University of North Carolina, Chapel Hill, 2013–2015

Coordinator, Infectious disease epidemiology journal club, University of North Carolina, Chapel Hill, 2009–2010

Associate editor for *BMC Infectious Diseases*

Reviewer for

*American Journal of Epidemiology*

*Epidemiology*

*Biometrics*

*Statistics in Medicine*

*Annals of Applied Statistics*

*Journal of Causal Inference*

*Epidemiologic Methods*

*Journal of Acquired Immune Deficiency Syndromes*

*Pharmacoepidemiology and Drug Safety*

*Journal of Clinical Epidemiology*

*Annals of Epidemiology*

*Occupational and Environmental Medicine*

*Antiviral Therapy*

*Computational and Mathematical Methods in Medicine*

*Lifetime Data Analysis*

*Plos ONE*

*Scientific Reports*

*Environmental Health Perspectives*

*Paediatric and Perinatal Epidemiology*

Society for Epidemiologic Research:

*Member*, 2009–Present.

*Publication Committee*, 2015–2018

*Symposium session chair*

2019 - “The elephant in the room: Causal inference in the face of competing events” (accepted)

2018 - “Epidemiologic research with incomplete and imperfect data: making progress in the face of uncertainty”

2017 - “Putting the ‘Implementation’ back into Implementation Science: Moving beyond the ‘Implications’ of Epidemiologic Research”

2016 - “Meeting in the middle: systems science and causal inference”

2015 - "Bayesian methods and causal inference"  
2014 - "Selection bias due to loss: An old and often ignored problem revisited"  
2013 - "Recording nature's answers: Measurement bias in epidemiology"

Sidney Kark Distinguished Teaching Assistant Award Committee, 2015
